Call for Abstracts

We cordially invite you to submit your abstracts for poster or oral presentations.

Thank you for submitting your results from research and practice on the following main topics:

- Neurodegeneration
- Neuroinflammation
- Neurooncology
- Neuromuscular biology

The Deadline for the abstract submission is 13 May 2016.

Abstracts should be submitted via www.dgnn-conference.de.

Registration

Please register online at www.dgnn-conference.de.

Guido Reifenberger (Düsseldorf/DE)
Stefan Rutkowski (Hamburg/DE)
Ulrich Schüller (München/DE)
Joachim Weis (Aachen/DE)
Manfred Westphal (Hamburg/DE)
Dear Colleagues,

We would like to welcome you warmly to the Joint-Meeting of the German Society for Neuropathology and Neuroanatomy (DGNN) and the Scandinavian Neuropathological Society (SNS) held in Hamburg.

This year’s program will cover a broad spectrum of diagnostic and experimental neuropathology including neurodegeneration, neuroinflammation, neurooncology and neuromuscular biology. Besides lectures by leading scientists, the program includes panel discussions, poster presentations and workshops.

The industrial exhibition and a lively social program will further complete the meeting.

The venue at the historical pathology building of the University Medical Center Hamburg-Eppendorf, now a medical museum is the ideal location for scientific exchange between young and experienced scientists, experimentally oriented researchers and physicians.

We hope to see numerous participants at our Meeting and look forward to many interesting contributions.

We are looking forward to an exciting meeting!

Markus Glatzel
Conference chair DGNN

Bjarne Winther Kristensen
Conference chair SNS

Venue and Date
Universitätsklinikum Hamburg-Eppendorf
Medizinhistorisches Museum Hamburg
Martinistraße 52

Hamburg

Without its roughly 2,500 bridges Hamburg would be a difficult city to navigate with dry feet. Unless, of course, you took the boat... Whether in the form of its enchanted labyrinth of canals, the elegant Alster lakes, the cosmopolitan Elbe or the nearby North and Baltic seas, the region is blessed with an abundance of water. Within Hamburg itself water defines the city’s atmosphere, plays a key role in its architecture and both reflects and heightens the beauty of the Elbe-side metropolis.

The city’s heart beats strongest at its port, where the scent of the Elbe and the great wide world hangs in the air. Tiny launches bob between huge ships, and the Elbphilharmonie – Hamburg’s majestic new landmark – glistens in the sun. The warehouse quarter reaches into the sky a short distance from Hamburg’s busy landing stages. Set against a charming backdrop of historic brick buildings, the city is building into the future: The new HafenCity district will one day be home to more than 12,000 people – right on the waterfront.

Good ideas take shape in the mind – and the best blossom at seats of learning and research. Hamburg’s universities and excellent research institutes attract intelligent, creative minds from Germany and beyond, and the work of their scientists enables ideas to take root and be turned into innovations within the Metropolitan Region. The professional support provided by over 23,000 firms from the IT, media and ad sectors facilitates the transformation of good ideas into good business.
